(54) Title: FEED MECHANISM FOR A VENDING MACHINE

(57) Abstract: Disclosed a feed mechanism for a vending machine capable of receiving transporting and discharging various products regardless of a change in size such as a length, a diameter etc. of the product. The feed mechanism includes a cabinet having a space receiving the products; a driving unit mounted on an upper portion of the cabinet; a transporting unit driven by the driving unit and having a plurality of pockets for receiving the products; and a discharging unit discharging the products transported by the transporting unit.
